JOHN SANEI

Talk

Understand the unrestrained human, digital and business possibilities of the future.

In this keynote, John unpacks the harmonious future of humans and technology and helps you explore and envision a life of unbounded possibilities within the new digital, social and economic futures.

Human 3.0_The Wisdom Reality

The skills of the future differ dramatically from those we currently have at our disposal. Today, everything from education to work and how to add and create value demands more cognitive flexibility. Emotional and social intelligence and creative and innovative mindsets are the building blocks of the future.

Web 3.0_The Synthetic Reality

Creative problem solving, resilience and a reimagined life all lie ahead. Technology has finally progressed to revolutionise our businesses and how we work within and without them. Learn how to leverage the metaverse, discover decentralised finance (de-fi) and explore new business ideas for physical and virtual audiences around the world.

Business 3.0_The Complex Reality

As patterns become non-repetitive its essential we move from economies of scale to economies of learning allow real business agility, an essential function for the future.

Explore how these changing realities merge through the Metaverse, Multiverse and complex business systems.

Collectively, we need to awaken a deeper meaning for humanity.
